SECTION 01

Chart of Accounts & Ledger Setup

Account types, reconciliation accounts, dimensions, financial groups & currency

Q1 What is the Chart of Accounts in Infor LN and how is it structured? Easy

ANSWER

The **Chart of Accounts (CoA)** in Infor LN is the complete list of all ledger accounts used by the financial company to record every financial transaction. It forms the backbone of the General Ledger and determines how financial data is classified and reported.

Structure:

- **Account Code** — Unique alphanumeric identifier for each account (e.g., 10000 for Cash, 20000 for Accounts Payable)
- **Account Description** — Human-readable name of the account
- **Account Type** — Classifies the account (Balance Sheet or Profit & Loss)
- **Account Category** — Further classification within the type (Asset, Liability, Equity, Revenue, Expense)
- **Financial Group** — Used for grouping accounts in financial statements

The CoA is defined at the **financial company** level and all transactions within that company must use accounts from this chart.

> **PRO TIP**
> Interviewers often ask: 'Can two financial companies share the same Chart of Accounts?' Answer: In Infor LN, each financial company has its own CoA, but they can be configured to use the same account codes for consistency across the enterprise.

Q2 What are the different Ledger Account types in Infor LN? Easy

ANSWER

Infor LN classifies ledger accounts into the following types that determine their behaviour in financial reporting:

Balance Sheet Accounts:

- **Asset** — Resources owned by the company (Cash, Receivables, Fixed Assets, Inventory)
- **Liability** — Obligations owed by the company (Payables, Loans, Accruals)
- **Equity** — Owner's interest in the company (Share Capital, Retained Earnings)

Profit & Loss Accounts:

- **Revenue / Income** — Income earned from business operations (Sales Revenue, Interest Income)
- **Expense / Cost** — Costs incurred in operations (Cost of Goods Sold, Salaries, Rent)

Balance sheet accounts carry balances forward year to year. P&L accounts are zeroed out at year-end and their net result transferred to Retained Earnings.
